Projects

Foodi Pal

[Live Site](#) || [GitHub](#)

Foodi Pal is a Restaurant Management Website. This project is made by react, node.js, express.js, mongoDB. Crud operations and login, signup made this site interactive.

Technologies - Node.js, JWT, MongoDB, NPM, Router, React.js, Express.js, Tailwind, Firebase

Main Features :- Here a user

- See All Food Items, See Single item, Add A Food item, Delete An Item, Modify An Item,
- Store data in MongoDB

Dream Property

[Live Site](#) || [GitHub](#)

Real estate Platform (an online platform where people can add and buy real estate properties) using the MERN stack. There are three roles Admin, Agent, and Guest/user. The user/guest only buys a property and add reviews, can delete reviews, the agent adds and deletes the property and sell property, and the admin sees all users and sellers, manage all properties, advertise properties.

Mindful-Moments

[Live Site](#) || [GitHub](#)
